

They signed a contract acknowledging that the long term effects and efficacy of the vaccine were unknown

5.5 Purchaser Acknowledgement.

Purchaser acknowledges that the Vaccine and materials related to the Vaccine, and their components and constituent materials are being rapidly developed due to the emergency circumstances of the COVID-19 pandemic and will continue to be studied after provision of the Vaccine to Purchaser under this Agreement. Purchaser further acknowledges that the long-term effects and efficacy of the Vaccine are not currently known and that there may be adverse effects of the Vaccine that are not currently known. Further, to the extent applicable, Purchaser acknowledges that the Product shall not be serialized.

A South African court has ordered that the Pfizer vaccine contract between the SA Government & Pfizer be made public.

And here it is : https://healthjusticeinitiative.org.za/wp-content/uploads/2023/09/OCRPfizer-1_Redacted.pdf and <https://t.co/uN1z9AkvLA>

It's reasonable to assume that the terms and conditions in this contract are similar for every nation.

Clause 5.5 provides,

Purchaser (the government) further acknowledges that the long-term effects and efficacy of the Vaccine are not currently known and that there may be adverse effects of the Vaccine that are not currently known.

So while politicians around the world were assuring the public that the vaccines were "**safe & effective**" - they'd signed a contract acknowledging that the long-term effects & efficacy of the Vaccine were not known and that there may be adverse effects of the Vaccine that were not known.
